#### SPECIFICATIONS AND PERFORMANCE

#### POWERFUL ULTRA QUIET, OIL-FREE AIR COMPRESSOR WITH AUTOMATIC DRAIN VALVE

## BENEFITS

The CAT-10020CHAD Air Compressor has a Oil-Free Dual Piston pump designed to have a life cycle before wear of 3000 Plus hours. The Oil-Free pump allows for use in a variety of temperatures (cold starts) and uneven terrains (no oil in the pump).

The Easy Start Valve feature allows for a easier start up using less starting amps. The Easy Start Valve releases a small amount of air from the pump at start up to produce a no-load condition allowing the motor to spin freely. This no-load start up requires less amps for a easier start up in cold temperatures.

The large low profile 10 Gallon Steel Horizontal Air Tank makes storing under a bench, desk or shelf very easy. The factory installed California Air Tools EZ-1 Automatic Drain Valve has been designed to eliminate manually draining your air compressor air tank. The manually set timer allows you to set the time for both the frequency and duration of the draining process.

The Auto Drain Assembly includes a Manual Drain with Strainer (which allows for easy maintenance/cleaning vs. standard Auto Drain models). This model is ideal for placement into locations where weekly/monthly maintenance is infrequent or difficult to perform.

The 10020CHAD model is ideal for placement on or under a shelf. The automatic drain valve supports required maintenance by removing water from the air tank on a regular basis.
